

Nationwide® Intelligent Underwriting

Available in all states except NY

Nationwide® Intelligent Underwriting streamlines the life insurance application process for both you and your clients. It can provide a faster and more efficient underwriting process with:

- Faster time to an underwriting decision
- · Fewer attending physician statements and less need for additional underwriting requirements
- · Accelerated process for some of the healthiest clients by eliminating exam and labs'
- · Less time spent on application paperwork, including the need for you to gather your clients' medical history

How does it work?

Completing the tele-interview

Option 1: Once the application has been entered into our system and submitted to the third-party vendor, they will contact the client to complete the tele-interview immediately.

Option 2: If the client is not able to complete the interview at that moment, they can schedule a call back for their preferred day and time.

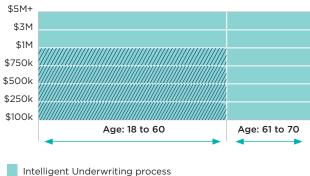

The interview will be recorded, and the client signs via electronic voice signature. Relatively healthy clients can expect an average interview time of 25 minutes, but time may vary significantly depending on client health and ability to provide detailed information on medical history.

Nationwide will notify you regarding additional underwriting requirements within a few days after completion of the tele-interview.

During the medical visit, the examiner may collect:

- Height, weight, blood pressure and pulse information
- Urine and blood samples

Eligibility guidelines²

- mm
- Possible acceleration without abbreviated exam and labs

Acceleration guidelines

Setting eligibility expectations

For some of the healthiest clients, an underwriting decision will be made without the need for additional underwriting requirements.

Some of the healthiest clients will **not** be accelerated simply because we don't have enough information to make a decision. Therefore, additional underwriting requirements will be needed to reach an underwriting decision. Preferred and Preferred+ underwriting classifications are still available, even if clients are not eligible for acceleration.
